Complex Problem Table

Sl. No	Application Domain	Complex Problem Identified	Justification
1	Virtual Goods	Ownership and Intellectual property	This model is justified from the perspective that virtual goods are part of digital ecosystem owned and managed by the platform provider.
2	Smart Transport	Data privacy and security	Ensuring data privacy is justified by the need to protect individual rights as guaranteed by laws like GDPR
3	Web domain	User experience and accessibility	Justifying their importance involves understanding their impact on usability, inclusivity and overall effectiveness of web platforms
